Questions about THC, CBD, Marijuana?

Learn more in 2 informational programs hosted by a professor . . .

Each session will feature a professor of pharmaceutical sciences, psychiatry and behavioral neurosciences from the WSU Pharmacy school and a panel of pharmacy students.

---

Session #1 - "THC, CBD and YOU"
Tuesday, Feb 18; 7:00 pm
A lay-level overview of delta-9-tetrahydrocannabinol (THC; marijuana) and cannabidiol (CBD) pharmacology, toxicology, laws, availability, myths and demonstrated truths. (45 minute presentation, followed by a brief Q & A session).

Session #2 - "THC, CBD and YOUR Meds"
Tuesday, March 24; 7:00 pm
An introduction to how different meds might interact, and a review of the potential and known interactions between THC, CBD and Rx and OTC meds; A shorter (30-min) presentation, followed by a longer Q & A. This session would also serve to tie up any loose ends from the first session.
